

After 5 years of continuous use, the oxygen equipment you have in your home is now considered to have reached its optimal lifespan and is being replaced per your request.

Medicare will cover the new equipment as long as it is still considered medically necessary. Once the billing cycle is restarted, you will continue to be responsible for the 20% coinsurance, unless you have a Medicare Supplement Plan that will cover that portion. Please note that you will also be responsible for any deductible amounts outlined by Medicare or your secondary insurance prior to their coverage.

You have 2 other choices to consider if you choose Not to accept this delivery:

+ To Not Continue your oxygen service with AdaptHealth and switch to another supplier. You will have 2 weeks to find a new supplier and have AdaptHealth's equipment returned. If you have not located a new supplier in 14 days, you will become financially responsible for the use and service of the oxygen equipment. (If you elect to go with another supplier, AdaptHealth will no longer be required to service the oxygen equipment in your home from your new supplier. Any future maintenance or issues with your equipment will need to be handled by your new supplier.)

+ To No Longer Use This Equipment If you choose to not receive new equipment from AdaptHealth and do not wish to switch suppliers, it is recommended that you request your Physician to send us a prescription to DISCONTINUE your oxygen. If you choose not to request that documentation, you will be required to sign an Against Medical Advice form before our drivers can take the equipment from your home.

Name Here Please initial here that you accept to receive replacement oxygen equipment due to the 5-year reasonable useful lifetime being met.
