IMPORTANT!

We require a complete PAP Titration Sleep Study that includes a Pressure Distribution Table to recertify the patient's oxygen equipment. If this is unavailable, please proceed to schedule an appointment with the patient for a TSS.

This patient is due for a 5-year Oxygen Replacement. The patient's insurance requires that we verify the patient is continuing to use and benefit from oxygen therapy.

Documentation Needed:**1. Face-to-Face Physician Evaluation/Progress Note**

- Confirm that the patient uses and benefits from oxygen therapy.
- Detail the condition requiring oxygen therapy, including evidence that the condition is chronic and stable during testing, that it is likely to improve with oxygen therapy, and the treatments attempted before starting oxygen.

2. Titration Sleep Study (completed within 30 days of the Physician Evaluation for nocturnal patients with OSA; referral to sleep medicine is required)

- The apnea-hypopnea index (AHI) must be reduced to 10 events or less based on a sample time of at least 2 hours.
- The study results must show at least 5 cumulative minutes with an SpO₂ below 88% during the 2-hour test.
- The patient must have a diagnosis of severe lung disease or another hypoxemia-related condition.

3. Prescription (RX) Requirements

- Include the patient's name.
- Specify the order date.
- Provide a general description of the item (for example, concentrator and portable equipment).
- Include the treating practitioner's name or NPI.
- Ensure the prescription is signed by the treating practitioner.
